

REMARKS

It is noted that the Examiner has withdrawn the rejections raised in his previous office action other than the rejection of claims 15 and 16. Claims 15 and 16 have been canceled from the specification in order to place the application in a condition for allowance.

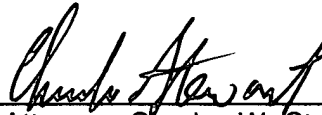

New composition and use claims 26-49 have been added to the specification. Support for these claims may be found in the allowed claims and in the specification at page 3, line 3 through page 5, line 21 and elsewhere.

It is submitted that the compositions of claims 26-46 and the use claims 47-48 are patentable over the prior art. Early allowance thereof is hereby respectfully requested.

Respectfully submitted,

MARIA B. H. VAN CRIJNEN-BEERS,
JEAN-PAUL DARNANVILLE,
CAROLUS M. A. M. MESTERS, and
THOMAS J. REMANS
